

	Kiwifruit Processing Company (2021) Limited	Revision No: 01
	Our Sustainability	Issue Date: 01/04/22
		Product: Puree - All types

We at Kiwifruit Processing Company (2021) Limited (Kiwifruitz), aspire to be a leader in business sustainability on the global stage. We are committed to this journey — as a business partner (with our suppliers and customers), an employer, a community member, an environmental steward, and a value creator for our shareholders. We continuously think and act sustainably, and we will deliver excellent customer service and strong financial results that will position the company for a strong future.

Being sustainable will better assist our company to enhance safety, efficiency and responsibility in a manner that protects our employees, our community, our shareholders and most importantly the environment, now and in the future.

Our day to day operations align our business performance with a commitment to environmental, social and community stewardship. Methods to reduce the environmental footprint and enhance sustainability include:

- Continuously reviewing our transport methods with an aim that minimises community and environmental impacts;
- Increasing our recycling and reuse efforts through waste minimisation practices;
- Continuously reviewing the supply chain in consideration of environmental effects and good governance;
- Communicating regularly with customers, employees and external stakeholders on sustainability issues, goals and efforts;
- Supporting sustainable development where possible in our communities;
- Collaborating with customers and communities to grow sustainably, considering social, economic and environmental effects; and
- Continuously reviewing and innovating company infrastructure to support operations and minimize resource use.

Sustainability is integral to the way we operate.
